

POSTDOC and TECHNICIAN job opportunities

We are looking for **two postdoctoral fellows** and a **technician**

to join the protein crystallography group of **Dr Maria Górna** at the **University of Warsaw**

to work on the **structure of human mitochondrial proteins with novel RNA-binding domains**

This is an opportunity to join a young dynamic team in a new interdisciplinary research unit of the University (UW BCRC/CeNT III), equipped in state-of-the-art equipment for expression, purification, **high-throughput crystallization and biophysical characterization of proteins** and their complexes.

We are looking for **outstanding postdoctoral researchers** who should have:

- Experience in protein biochemistry and purification and/or protein crystallography,
- Good publication record, fluent spoken and written English,
- Preferable: good knowledge of bioinformatic/crystallographic tools and model analysis.

We are looking for **a motivated technician/research assistant** with the following:

- Good basic knowledge of protein biochemistry, molecular and cell biology,
- Good grade average and study records, good spoken and written English.

The application should be sent to: recruit.gorna@gmail.com by the **end of August 2015**. The most promising candidates will be invited for an interview in person or by phone/video chat.

The candidates should provide the following information with the application:

- **Motivation letter,**
- **Letters of recommendation (preferably)** or e-mail contact details for referees (2 referees for postdoctoral researchers, 1 referee for a technician candidate),
- **CV** including: list of publications, grade average from the studies (for technicians), awards, studentships, major conference presentations, internships and any other relevant information.

The positions will be available from **October 2015** for **36 months** as a contract of employment, with netto monthly salary around 3200-3500 PLN (postdoctoral researchers) and 2500 PLN (technician).
